# Epiprotect receives Oracle code within Mediclinic in the United Arab Emirates

WED, APR 13, 2022 16:31 CET

S2Medical AB (publ) has today received an order code (Oracle code) for the products in the Epiprotect series within Mediclinic in the United Arab Emirates. Mediclinic is one of the largest private care providers in the country with seven hospitals and over 20 clinics with a total of over 900 beds. The order code allows for regular orders for the coded product and has thus opened up for further growth in the company's branch in Dubai.

Mediclinic Middle East is part of Mediclinic International, which has a total of 48 hospitals in four countries and an approximately 30% shareholding in the UK-based Spire Healthcare.

*"With this, we have taken a big step into the private healthcare market in the United Arab Emirates. The need for our unique wound healing products is great and the service we offer to customers in the form of, among other things, availability and training is extremely appreciated, which has now yielded results in the form of another large hospital chain that will start buying our products." says the company's COO Mårten Skog.*

This information is such that S2Medical AB is obliged to publish in accordance with the EU Market Abuse Regulation (EU no. 596/2014). The information was submitted, through the care of the specified contact person, for publication 2022-04-13 16:31 CET.

## About S2Medical

S2Medical AB (publ) is a medical technology company that develops and sells innovative wound healing products for the entire wound healing process with a focus on burns and chronic wounds. The company has developed eiratex®, a new cellulose-based material for healing severe burns and chronic wounds. The material heals wounds effectively and thus reduces both suffering for patients and costs for health care.
